(54) PRODUCTION OF BLACK TEA-FLAVORED SPARKLING ALCOHOLIC BEVERAGE

(57)Abstract:

PROBLEM TO BE SOLVED: To produce a well-harmonized black tea-flavored sparkling alcoholic beverage that is prevented from turbidity caused by combination of tannin precipitated at the time of extraction of black tea with protein contained in beer or sparkling alcoholic beverages and without practically unbalancing flavors of the beer or alcoholic beverage while utilizing effectively an existing production facilities.

SOLUTION: This production of a black tea-flavored sparkling alcoholic beverage comprises steps of: forming maische from malt as the starting material and warm water by mixing them, saccharifying the malt, filtering the malt to obtain wort, boiling the wort together with hop added to the wort, cooling and filtering the hot wort, and fermenting the wort, in such a way that black tea leaves are added to the maische before the filtration of the maische, or to the wort during or after boiling or before the filtration of the wort.
